

Average residential ESS price per 50kWh in New Zealand

How much does electricity cost per kWh?

The national average is 35.67c per kWh, but prices ranging from around 32c to over 45c per kWh. Between a third and half of power price costs are due to transmission charges. We all rely on electricity in our day-to-day lives. And whether you are watching TV, running a heat pump, or putting on a load of washing - you're adding to your power bill.

How much does a kWh cost in New Zealand?

However, depending on where you live in the country, the price can vary between as low as 31.93c per kWh, in Christchurch, to 45.42c per kWh in Kerikeri and 45.45c in Westport. Of course, you can't do much about where you live, apart from move.

How have residential electricity costs been revised?

residential costs back to the year ended March 2009 have been revised based on consistent information provided by all electricity retailers. Some retailers have also provided revised data back to the year ended March 2002. This has been incorporated into the residential electricity cost data.

How does the Ministry monitor residential electricity costs?

The Ministry monitors national residential electricity costs using information about national electricity sales (essentially total electricity sales divided by the quantity of electricity supplied in kWh). Residential cost data is derived from information obtained primarily from electricity retailers.

How does the government calculate residential electricity cost per unit?

The Ministry collects the total value of sales, the total volume of electricity sold, and the number of connections. The residential electricity cost per unit is derived by dividing the dollar value of residential electricity sales by the number of kilowatt-hours (kWh) sold to residential customers.
