

Average residential ESS price per 5kW in Mexico

How much does electricity cost in Mexico?

Learn more Household electricity prices in Mexico amounted to 11 U.S. dollar cents per kilowatt-hour in December 2024. Residential electricity prices have increased steadily in the country since the end of 2020, when they were at 8.2 U.S. dollar cents per kilowatt-hour.

What factors affect the price of electricity in Mexico?

The country's electricity pricing is determined by a combination of factors, including government policies, fuel costs, and infrastructure investments. In recent years, fluctuations in these rates have had a profound impact on the cost of living and the competitiveness of Mexican industries.

What is Mexico's energy policy?

Mexico implements policies in 5/9 power policy categories tracked by Climatescope, including Renewable energy target, Net metering, Import tax incentives, Renewables mandate, and Renewable Energy Certificates. The average electricity price in Mexico has increased from 119.52 USD/MWh in 2022 to 151.60 USD/MWh in 2023.

Why does Mexico have different electric rates?

Since CFE is the electric company for Mexico, the entire country is divided up into areas with different electric rates. This is actually pretty fair because different regions of Mexico are hotter than others and you get a lower rate in a hotter place since you need to use more to keep cool.

What is the most expensive utility in Mexico?

Probably your most expensive utility in Mexico will be your electric bill. Comisi#243;n Federal de Electricidad or CFE manages your electricity in Mexico. It's a non-profit public company that the Mexican government runs. Your cost or "tarifa" will vary based on where in Mexico you live and what time of the year it is.

What is Mexico's Energy Challenge?

As Mexico continues to modernize its energy infrastructure and explore renewable energy sources, the challenge remains to balance affordable electricity rates with the need for sustainable and reliable energy supply.
