

China-europe wind power storage subsidies

Where are China's wind turbine subsidies going?

Chinese state subsidies behind wind turbine operations in Spain, Greece, France, Romania and Bulgaria will be investigated. China overtook the EU in 2020 as the largest maker of wind power installations, and now accounts for over half of the world's wind turbines in operation. | AFP via Getty Images

Will a European Union probe hurt China's monopoly on wind turbines?

[Photo/Agencies]A probe launched by the European Union into subsidies received by Chinese suppliers of wind turbines to the continent,will harm the legitimate rights of domestic businesses to engage in fair competitionand undermines the stability of global industrial and supply chains,experts said.

Will European Union probe Chinese wind turbine suppliers?

Brussels (Belgium) (AFP) - The European Union on Tuesday announced a probeinto Chinese wind turbine suppliers,the latest move by Brussels targeting Beijing over green tech subsidies suspected of undermining fair competition.

Are Chinese wind turbines a threat to Europe's wind parks?

While local producers like Siemens Energy and Vestas still supply the bulk of wind turbines to Europe's wind parks, they are increasingly facing Chinese competition on the world market - potentially threatening their positions in a global race to develop more efficient, and cheaper, turbines.

What is the European Commission doing about Chinese wind turbines?

BRUSSELS -- The European Commission is launching a new foreign subsidies probeinto Chinese wind turbines. The news is expected to be announced by European Commission Executive Vice-President Margrethe Vestager at 3 p.m. CET,in a speech in Princeton that was previewed by POLITICO's China Watcher.

Is China launching a new inquiry into wind turbine suppliers?

"I can announce today that we are launching a new inquiryinto Chinese suppliers of wind turbines," Vestager said. "We are investigating the conditions for the development of wind parks in Spain,in Greece,in France,in Romania and in Bulgaria."

He noted that some in Europe had attributed the success of Chinese companies to subsidies -- while the EU was at the same time offering large subsidies to companies that ...

China will replace its feed-in tariff (FIT) system with a fully market-driven renewable energy pricing model by June 2025, shifting wind and solar projects to competitive bidding and market ...
