

Commercial energy storage tender price in Australia 2025

Did Australia invest in energy storage projects in Q1 2025?

Australia's remarkable run of investment commitments to energy storage projects continued in Q1 2025. Six storage projects representing 1,510 MW (capacity) /5,016 MWh (energy output) reached financial close - the second-highest quarterly result for newly financially committed storage projects.

What is the most successful long duration storage tender?

"Tender 5 was the most successful long duration storage tender to date," Codevelle said. "It demonstrates the strong market interest to invest in long-duration storage projects and we're excited to see more in Tender 6."

How many storage projects are there in Australia?

There are also 69 committed storage projects (either standalone or hybrid projects) currently in this pipeline, equivalent to 12,532 MW /32,078 MWh in capacity /energy output. Read the latest updates from the Clean Energy Council and across the industry. When it comes to Australia's energy future, communities have legitimate questions.

Will investment continue to trend upwards in 2025?

There is cause for optimism that investment will continue to trend upward throughout the remainder of 2025 given the certainty and policy continuity stemming from the federal election outcome and impact of policies such as the Capacity Investment Scheme. Two projects representing 386 MW of new generation capacity reached financial commitment.

Is it time to invest in energy storage?

For every petajoule of energy consumed in 2023-24, GDP increased by \$436m. Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage.

Wendel Hortop, director of Australia at Modo Energy and a speaker at the upcoming Energy Storage Summit Australia 2025, believes the value of LDES technologies will be unlocked through multi-day storage ...
