

# Domestic energy storage supplier quotation in Italy 2025

When will Italy's new energy storage capacity procurement auctions take place?

Terna's thinking ...The date is set. The first of Italy's new energy storage capacity procurement auctions (MACSE) will take place on September 30, 2025, Terna's president for grid development strategies, Francesco Del Pizzo, has confirmed.

How much does energy storage cost in Italy?

From ESS News The results of Italy's main grid capacity market auction for 2025, published by Terna, show that energy storage represented 51.1% of the 174 MW of new capacity assigned. Thermoelectric plants made up the balance, with the new capacity secured for EUR67,500 (\$72,900)/MW per year, for a total cost of EUR11.75 million.

What is Italy's main grid capacity market auction for 2025?

Italian electricity transmission system operator Terna has published the results of 2025's main capacity market auction. From ESS News The results of Italy's main grid capacity market auction for 2025, published by Terna, show that energy storage represented 51.1% of the 174 MW of new capacity assigned.

Is MACSE a risk-averse investment in Italian energy storage?

From ESS News 2025 is set to see rapid growth in investment in the Italian energy storage sector, led by battery energy storage systems (BESS), with the implementation of MACSE. The eagerly anticipated procurement exercise will offer a stable, predictable premium over 15 years, making it particularly attractive for risk-averse investors.

What is the EU energy storage programme?

It will be led by transmission system operator (TSO) Terna. The EU approved a EUR17.7 billion package to fund the programme in December 2023, and Terna is aiming for it to support the deployment of 50GWh of energy storage by 2030, which is lower than the initial 71GWh forecast.

How much power does ESS generate per year?

Regarding imported power, the northern section of the grid secured 4.2 GW for EUR4,788/MW per year, the central-south region 113 MW for EUR3,968/MW per year, and the south 52 MW for EUR3,491/MW per year. To continue reading, please visit our ESS News website.
