

Factory solar storage tender price in Vietnam 2025

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

How much solar power does Vietnam have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024. Last year's new additions totaled around 79 MW. This content is protected by copyright and may not be reused.

Are solar plants equipped with BESS eligible for higher rates?

For the first time, solar plants equipped with BESS will be eligible for higher rates to compensate for the added complexity and investment costs. Tariff levels are also region-specific, taking into account solar radiation potential in Northern, Central, and Southern Vietnam.

The most significant development in this update is the introduction of differentiated tariffs for solar power projects that incorporate battery storage. For the first time, solar plants equipped with BESS will be eligible for ...

EPC firm Power China's recent 16GWh BESS supply tender has seen very low prices bid, amidst a squeeze of market share from state-owned firms.
