

Government procurement price of container energy storage in Belgium

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore "energy atoll" (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

What funding is available for R&I projects in Belgium?

Belgium: Energy Transition Fund. Support for R&I projects for energy. In this context, several publicly funded R&I projects which also include storage, are being performed by Belgian research centres. The funding for energy related R&I projects in 2022 amounts to 25 million EUR.

Should energy storage tariffs be cost-reflective?

as set by the Electricity Market Regulation. As per art. 18 of the Regulation, tariffs should be cost-reflective and not discriminate against energy storage - quite often, storage operators face disproportionate network fees that don't take into account the benefit brought by energy stor

How much storage capacity does Belgium need in 2020?

The need for storage capacity in Belgium is expected to increase from 7 GW to 12 GW in 2020.

Does energy storage get the same treatment across the EU?

Across Member States Executive Summary Energy storage doesn't receive the same treatment across the European Union as far as grid fees go: different technologies, different location (behind-the-meter vs front of the meter), have to face a variety of tariff structures, often not consistent with the EU-level rules
