

Government procurement price of domestic energy storage in New Zealand

How does a retailer buy electricity in New Zealand?

Instead, they buy power from an electricity retailer. Retailers buy at the spot price or through contracts with generators and offer electricity to consumers using their pricing plans. In this way, retailers absorb risk from New Zealand's volatile electricity market, in a similar way to companies providing house or car insurance.

When are retail tariffs surveyed in New Zealand?

A limited selection of publicly advertised retail tariffs are surveyed for around 40 towns and cities across New Zealand. Prices are surveyed as a snapshot at the mid-point of each quarter (15 February, 15 May, 15 August and 15 November each year).

What is a retail power bill in New Zealand?

Retail power bills in New Zealand cover the range of different services which deliver power supply to households and businesses. The main parts of an average power bill include the cost of generation, transmission, distribution, retailer operation and GST. The largest portions of the bill are for generation, transmission and distribution.

What types of energy providers are eligible for a secondary procurement process?

Installation for distributed and embedded energy generation (eg solar panel installation). Energy audits or external energy management advice or software. Liquefied petroleum gas (LPG) and natural gas providers. Eligible agencies and schools are required to join the secondary procurement process (SPP).

Where can I find the quarterly survey of domestic electricity prices (qsdep)?

At URL provided, find the link to the Excel spreadsheet under the 'Quarterly Survey of Domestic Electricity Prices (QSDEP)' heading. This data forms the table Energy - Quarterly domestic electricity prices by town or city Feb 2004-May 2025. The QSDEP is a price indicator series that complements sales-based electricity cost data.
