

Government procurement price of photovoltaic ESS in Spain

What subsidies are available for solar energy in Spain?

o Capital Subsidies: The Spanish government, through programs like the Next Generation EU funds, has provided subsidies to offset the initial costs of installing solar self-consumption. These subsidies have been available for residential, commercial, and industrial sectors, though many concluded by December 2023.

What are the targets for photovoltaic energy in Spain?

The targets for photovoltaic (PV) energy in Spain are outlined in the "Integrated National Energy and Climate Plan" (PNIEC). The 2023 update of the PNIEC, published in September 2024, sets the following targets for 2025 and 2030:

- o Total PV target for 2025: 46,5 GWn
- o Total PV target for 2030: 76,3 GWn
- o Self-consumption PV target for 2030: 19 GWn

How will the European Commission affect the photovoltaic industry in Spain?

The European Commission (EC) has presented 2 measures that will have an impact on the photovoltaic industry in Spain: The Net-Zero Industry Act (as a response to the US Inflation Reduction Act) and the REPower EU (as a response to the energy dependence).

How much do solar panels cost in Extremadura?

In Extremadura the savings on the total installation price can be 40% of the total, with a maximum of EUR33,000 per installation. Subsidies for the installation of solar panels in Galicia are 50% of the total budget, with a maximum amount of EUR60,000.

What subsidies are available for solar panels in Castile & Leon?

Subsidies for the installation of solar panels in Castile and Leon can be up to 40% of the total cost of the installation. ICIO tax rebates: up to 95%. There will be subsidy discounts in municipalities with less than 5,000 inhabitants and SMEs.

Are EU-funded solar grants still being paid out in 2024?

The EU-funded solar grants are still being paid out in 2024 even though the deadline to apply for them was 31st December 2023. As we said above, people have actually received this subsidy already. But in case you want to see how it worked let's take the example of a 5 kW system.

This report provides an in-depth analysis of the rapid growth and development of photovoltaic power systems in Spain, highlighting significant milestones, market trends, and prospects.

In the first quarter of 2024, the average PPA price for solar energy was EUR38.50 per megawatt-hour (MWh), positioning Spain as the most cost-effective market for solar PPAs in Europe.

Government procurement price of photovoltaic ESS in Spain

6 · Latest Spain tenders and bids. Source new opportunities with the biggest and most comprehensive platform for Spain etenders and eProcurement. Track over hundred thousand verified tenders from public and private ...
