How does electricity work in Haiti?

With very limited access to electricity, most of the population in Haiti depends on charcoal as a source of energy. The National Electricity Company (Electricité d'Haïti - EDH) was created in 1971 to operate the newly built Pétion-Ville hydroelectric plant and the nation's power system.

How does a lack of capacity affect the electricity sector in Haiti?

Since the MTPTC is the main government body in charge of the electricity sector, this lack of capacity affects directly the performance of the sector. In 2017, the World Bank invested a total of \$35 million in Haiti in order to improve access and expansion of renewable energy.

What are the energy resources in Haiti?

Haiti has limited energy resources: no petroleum or gas resources, small hydroelectricity potential and rapidly declining supplies of wood fuels. With very limited access to electricity, most of the population in Haiti depends on charcoal as a source of energy.

How much CO₂ does Haiti produce?

OLADE (Latin American Energy Organization) estimated that CO₂ emissions from electricity production in Haiti in 2003 were 206,000 tons of CO₂, which corresponds to 12% of total emissions from the energy sector. Currently (November 2007), there aren't any CDM projects in Haiti.

What is the institutional framework of the electricity sector in Haiti?

The institutional framework of the electricity sector in Haiti is weak. The entity in charge of the energy sector is the Ministry of Public Works, Transports and Communications (MTPTC). The minister is also the president of the executive board of the state-owned power company, EdH (Haiti Electricity Company).

Why is distributed solar PV the only energy source in Haiti?
