Is a long-term CD a good investment?

Long-term CDs gives you the option to get a fixed interest on your money for a long period of time. In the current rising interest rate enviroment,it may be a good idea for investors who need a safe investment. How does a long-term CD differ from a regular savings account?

Should I buy a CD over a high-yield savings account?

CD terms usually auto-renew at the rate offered at maturity if you don't do anything. One of the reasons you might want to consider a CD over a high-yield savings account is because savings accounts have variable APYs, and with a CD you lock in the rate the day you open the account.

What is the best short-term CD rate?

Some offers may come from WalletHub's advertising partners. With an APY of 4.45% APY, Bank of Utah's 3-month CD becomes one of the best short-term certificates on the market. If you're looking for a top 6-month CD rate that has a reasonable deposit requirement, Northern Bank is your best option, with an APY of 4.50% and only \$500 minimum required.

Why is liquidity important for long-term savings?

Taking into account liquidity is key for any deposit, but can be extremely important for long-term savings. Here's what you need to know: CD accounts: Fixed-term CDs will often incur penalties for early withdrawal in order to encourage depositors to keep funds for the agreed term. Keep this in mind when selecting a CD term.

Is a 3 year CD a good investment?

FDIC deposit insurance covers the failure of an insured bank and NCUA deposit insurance coverage covers the failure of an insured credit union. If you're looking to grow your savings for the long term,a 3+-year CD could be the right option. With Raisin,you can find some of the highest long-term CD rates -- all accessible from a single login.

Do long-term CDs pay higher interest rates?

While long-term CDs typically pay higher interest rates than short-term CDs,that hasn't been the case recently. Right now,you can find six-month and one-year CDs that pay annual percentage yields of between 4% and 4.5%. Most of the highest-yielding five-year CDs are paying around 4% APY. But that trend may soon be reversing.
