

Solar Panel EPC turnkey quotation per 5kW 2026

What is solar EPC?

The term Solar EPC represents a model where one company, known as the EPC contractor, is responsible for managing the entire process of a solar energy project. The acronym EPC stands for Engineering, Procurement, and Construction, encapsulating the three core phases of solar project development.

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.

How does the EPC model work for solar projects?

For companies like JMS Energy, managing and delivering extensive solar projects requires a coordinated and efficient approach. The EPC model provides this by consolidating all necessary services into a cohesive process, allowing large projects to proceed smoothly and reliably.

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

What is solar EPC (engineering procurement & construction)?

To ensure the successful implementation of solar projects, the Solar EPC (Engineering, Procurement, and Construction) model is widely adopted. Solar energy continues to gain momentum as one of the most promising renewable energy sources.

What happens if the EPC contract is uncertain?

Any uncertainty in the EPC Contract may unfortunately see the Contractor liaising directly with these third parties and possibly risking the relationship of the Project Company with key influencers, customers and long-term neighbours.

What Is EPC in Solar? Engineering, Procurement & Construction Explained EPC (Engineering, Procurement, and Construction) is a turnkey project delivery model where a single contractor manages all phases of solar development --from ...
