

# Successful bid price of Solar Panel project in Netherlands 2026

What are the future prospects for solar PV in the Netherlands?

Cederik Engel, Managing Director of CCE The Netherlands and Head of ESG at CCE Holding, sees strong prospects ahead. The Netherlands leads the EU in per-capita solar PV capacity, having added around three gigawatts annually over the past three years.

Are solar panels a niche market in the Netherlands?

However, in time, the Dutch industry will focus more on a niche market with aesthetic, thin-film, flexible solar panels that are suitable to integrate into buildings to expand solar capacity while saving space. The Netherlands' potential does not lie in large scale production, but rather in mass customisation and light-weight panels.

What is the largest solar market in the Netherlands?

In 2022, the largest market segment in the Netherlands was the residential rooftop market, with a 46% share (about 1.8 GW) of the total market. The commercial rooftop market accounted for a 30% share (about 1.3 GW), while the ground-mounted and floating solar PV market accounted for 24% (about 0.9 GW).

According to the Global Market Outlook for Solar Power report, the market in the Netherlands is developing strongly, with an addition of 3.9 GW of solar PV capacity in 2022 and a project programme already approved for 11 ...
