

Successful bid price of industrial battery cabinet project in Guernsey 2026

What happens if a battery procurement is delayed?

Delays in the procurement of batteries could lead to failures to comply with regulatory mandates, or, for utilities opting to install storage as NWA in place of other system upgrades, the failure to implement necessary system improvements.

What are the different types of battery procurement agreements?

There are primarily three types of agreements relevant to battery procurements: (1) purchase agreements, (2) master supply agreements (MSAs), and (3) capacity reservation agreements (CRAs).

What happens if a supplier fails to deliver a battery?

If the supplier fails to deliver the batteries by a guaranteed delivery date, the supplier will begin to incur delay liquidated damages. Similarly, there may be delay and/or performance liquidated damages if substantial completion has not been met by a guaranteed substantial completion date.
